IF YOU FORGET, WE’LL REMEMBER.

What you need is a backup solution. Not the inconvenience of storage requirements, hardware upgrades, cloud provisioning, software maintenance, or the worry of changing tapes and failed back-ups. Ricoh’s Backup as a Service gives you what you need, so you’re not paying for what you don’t. We’ll manage your on and offsite backup using backup appliances and cloud-based services.

Backup as a Service offers:
- All-in-one backup appliance
- Flexible recovery options
- Instant appliance replacement
- Proactive management of backups
- Automatic firmware updates
- Multi-year discounts
- Hardware refresh after four years
- Subscription pricing for predictability
- Support for physical and virtual machines

Benefits of Backup as a Service:
- Daily monitoring and management
- Unlimited cloud storage and replication
- File/folder and application restores
- Remote restore and basic disaster recovery testing
- Detailed reporting

Our Canadian offsite data centre ensures your data is secure, and never leaves Canadian soil.

In business today, it’s no longer about keeping up, it’s about staying ahead. Ricoh IT Services is your partner in anticipating and understanding the needs of your customer, and delivering IT solutions focused on empowering the growth of your business. Turning data into insights. Turning technology into innovation. Turning vision into reality. This is Insightful IT.
