**SIMPLIFIED DEVICE MANAGEMENT
AND DEPLOYMENT**

Device deployment can be a difficult task to manage for any organization.

Microsoft's Autopilot, combined with Intune, can simplify and streamline the processes around lifecycle management for your hardware devices, and ensure they are compliant with your organization's standard configurations.

**Enable seamless device
deployment and detailed
management of hardware**

Automate how your organization deploys and manages hardware devices that adopt the latest best practices and provide a seamless experience for your employees.

Benefits to your business

- ✓ Greater security and compliance
- ✓ Reduces the time spent on deploying, managing, and retiring devices
- ✓ Reduces the infrastructure required to maintain the devices
- ✓ Enables ease of use for all types of end users

RCONSULT INTUNE ENABLEMENT

Microsoft Intune simplifies device configuration and application deployment, while also ensuring they are compliant with your organization's IT policies. Devices enrolled with Intune will have customizable profiles deployed, with a range of options such as application deployment and version control, and security controls such as multi-factor authentication enforcement. This provides a robust and consistent user experience for your organization.

Intune's centralized device profiles can be managed centrally across your organization, dramatically reducing your management overhead.

Key benefits:

- Provides alerts for visibility when devices encounter any health issues
- Enables security controls to enhance data protection and user account security
- Improves user experience by delivering consistent configuration and application profiles that can be configured per department
- Easily managed from the M365 portal with a consolidated view of your organization's enrolled assets
- Integrates mobile devices into a centralized management platform for consistent configuration and security controls
- Seamlessly deploy Intune-compatible software and ensure it stays up to date for a better UX

Features:

- Customized Intune profiles
- Security and data controls
- Device compliance for consistency
- Mobile device management for enhanced controls
- Intune health reports for enhanced visibility
- Enabled through M365 licensing for cost efficiency

Solution includes:

- Intune whiteboarding session
- Active Directory and Azure AD configuration
- Intune enablement and configuration
- Windows, Android, and iOS profile and policy configurations
- Intune device enrolment
- Documentation for self-service device enrolment and how-to guide

RCONSULT AUTOPILOT ENABLEMENT

Microsoft Autopilot's pre-configured deployment profiles can be rolled out to your end-user devices straight from the OEM with almost zero effort from your IT department. Users simply enter their credentials and Autopilot will enrol their device into both Intune and Azure Active Directory (Azure AD), then deploy your organization's profile based on pre-configured options. Intune consistently maintains the device standard across your organization while ensuring a seamless user experience in application versioning, security controls and IT policies.

94%

consider it important to have all their communications and collaboration functions well integrated into a single complete offer.¹

¹The three things market disruptors do differently in their infrastructure

Key benefits:

- Deploy pre-configured corporate devices and applications directly from the OEM to your end-users
- Enable security controls to enhance your data protection and user account security
- Improve user experience by delivering consistent configuration and application profiles that can be configured per department
- Easily managed from the M365 portal consolidated view of your organization's enrolled assets
- Integrate mobile devices into a centralized management platform for consistent configuration & security controls
- Seamlessly deploy Intune-compatible software & ensure it stays up-to-date for a better UX

Features:

- Near-zero touch deployment
- Security and data controls
- Automatic Azure AD and Intune enrolment
- Mobile device management for enhanced controls
- Customized Intune profiles
- Enabled through M365 licensing for cost efficiency

Solution includes:

- Autopilot whiteboarding session
- Active Directory and Azure AD configuration
- Intune enablement and configuration
- Autopilot enablement and configuration
- Windows, Android, and iOS profile and policy configurations
- Autopilot device enrolment
- Documentation for self-service device enrolment and how-to guide

EMPOWERING DIGITAL WORKPLACES

The greatest asset of a company, a country and the Earth itself is the imagination of its people. Through creativity and collaboration, people can improve the way communities live and work together. Ricoh strives to provide the right combination of technology, expertise and service to inspire and enable powerful transformation in your organization.

Since our beginning in 1962, we've been on the forefront of workplace innovation. Back then, that meant creating the first office fax machine. Today, we're empowering digital workplaces, which means connecting people to information, faster and more conveniently than ever before. We'll help you to improve employee productivity, better serve your customers, and grow your business. As for tomorrow, that vision is already taking shape in our minds and labs. And as digital workplaces continue to change the way we work, our imagination will continue to help you work smarter.

WHY RICOH?

- ✓ 600+ customers nationwide
- ✓ Ricoh's IT Services specializes in the design, implementation, security, and support of all infrastructure, cloud and networking systems to help you work smarter, faster and more securely
- ✓ Dedicated IT solutions specialist located across Canada
- ✓ Award-winning technology combined with end-to-end professional services and support
