Digital Forensics Services

Comprehensive solutions for fast, reliable, and defensible ESI collection.

A proven way to collect data

Key litigation information may be hiding in a myriad of digital locations. When you work with our team of forensics experts, we offer customizable Electronically Stored Information (ESI) collections and ESI management options.

Our comprehensive data collection services include on-site and in-lab collection in Canada. Our lab facility is equipped to collect ESI from mobile devices, laptops, desktops, and servers in a forensically sound manner utilizing industry trusted technology.

Advanced technology and forensically sound tools

We offer technology agnostic solutions and have the resources and expertise to help you manage your ESI correctly and minimize your risk throughout the entire eDiscovery process.

We instill confidence by designing solutions to meet your needs. Our cloud-based eDiscovery technology solutions are hosted within our industry leading and secure cloud environment, so you can rest assured that your data is in safe and reliable hands.

Why Ricoh eDiscovery?

- Forensics and data collection performed by a team of experts
- Data collection and preservation
- Consulting services to ensure defensible workflows
**eDiscovery Collection**
Efficiently search, filter, collect and produce responsive electronic records in support of your litigation efforts from workstations, email and network shares. Our processes are scalable from small businesses to multi-national corporate networks.

**Digital Media Preservation**
Secure a verified copy of any data source for preservation or production in litigation matters. e-Forensic staff are experienced in preserving hard disks, servers, email, webmail, smart phones, cell phones, digital video recorders (including security cameras), tablets and a variety of portable media.

**Litigation Support**
Ricoh has the technical knowledge and experience that can be of crucial assistance in preparing agreements, orders, affidavits, Anton Piller orders and interviewing IT witnesses.

**Forensic Analysis**
Our experts use state-of-the-art techniques and tools to glean and explain relevant data from preserved media. We have extensive experience “connecting the dots” in digital media investigations. All our experts are certified in the use of industry standard forensic analysis software and have had years of experience in providing clear, concise written reports for use in court or arbitration matters.
