

Device Management Solutions for SMB

Business Information Solutions

RICOH
imagine. change.

Does This Sound Like Your Current Situation?

Managing your multifunctional products and printers is critical to the efficient operation of your business. But the daily grind of checking toner, ink and paper levels, capturing meter reads and maintaining firmware upgrades can be overwhelming. In addition, not understanding your user-to-device ratios can make it difficult to optimize your entire fleet. All of this leaves you looking for ways to solve your device management challenges despite a shrinking IT budget.

Control device fleets with Ricoh.

Ricoh's Device Management Solutions for SMB offers two of Ricoh's most powerful tools – Device Manager NX and @Remote – as proven solutions to manage, monitor and configure devices.

| | |
|--|---|
| | <p>Your Challenge: The Cost of Stand-Alone Devices</p> <p>Our Solution: The excessive time and costs associated with managing individual devices puts pressure on your IT resources as it takes employees away from core business tasks. Our solution lets you efficiently manage Ricoh networked devices from a central location.</p> |
| | <p>Your Challenge: Lack of Fleet Visibility</p> <p>Our Solution: Managing devices, long with the multiple scans, copies, prints and faxes they generate, can be time-consuming and inefficient. Ricoh's solution offers complete reporting for usage assessment and analysis.</p> |
| | <p>Your Challenge: Lack of Usage Control</p> <p>Our Solution: Output management through monitoring colour printing and single vs. duplex printing, can help to save money and support your green initiatives. Our solution puts you on the fast track to savings with administrative tools that help monitor and manage document output more effectively.</p> |
