

Distributed Scanning Solution for Retail

Business Information Solutions

RICOH
imagine. change.

The need to process information in near real-time and provide actionable insights is driving retailers to leading-edge technology.*

The Business Challenge

Every day, your first priority is providing excellent customer service and a great shopping experience for your store guests. But every day, your focus is diverted to making sure business-critical paper documents reach corporate headquarters in a timely manner. So how do you get thousands of documents – such as vendor bills of lading and invoices from decentralized, store level locations to corporate headquarters for processing and storage? How do you achieve this without ringing up millions of dollars per year for overnight delivery services? And how do you make sure that information is accessible via computers, tablets or smartphones anytime, anywhere?

Ricoh is your partner for document workflow and business process management.

Ricoh has deep expertise in helping customers change the way they work. Our Distributed Scanning Solution for Retail provides a fast and efficient way to manage and route documents to a centralized location. By combining our reliable multifunction colour devices with our best-in-class advanced scanning software, you can enjoy

the benefits of a digital document workflow that is linked up with your corporate Enterprise Content Management (ECM) or Business Process Management (BPM). This not only addresses your unique document challenges, it makes the information more accessible and allows you to focus on more important business.

	<p>Does waiting days or weeks for business critical documents bring your workflows to a screeching halt?</p> <p>Every important piece of paper can be subject to prolonged wait times. That holds up decision-making and slows efficiency. Ricoh's solution replaces overnight delivery with a fast, easily accessible digital document workflow.</p>
	<p>Does it take too many manual processes and steps to get documents into your ECM stream?</p> <p>Scan it and it's done with Ricoh. Our advanced capture solution combined with RICOH® MP C4503 and MP C5503 Multifunction Devices brings efficiency, speed and scalability to your operation. Documents from multiple store locations arrive in your ECM instantly so information is always up to the second.</p>
	<p>Are the costs associated with your overnight shipping, and off-site storage becoming difficult to justify?</p> <p>Ricoh Distributed Scanning Solution for Retail can help drastically reduce overnight shipping costs. Not only can you increase workflow efficiency, you'll reduce prolonged waits for business-critical documents and warehousing costs associated with long-term, off-site, storage. Plus you save paper because documents can be accessed and distributed electronically.</p>
