CONTINUOUS PROTECTION FOR YOUR WORKSTATIONS & SERVERS.

With today’s targeted attacks, malware and ransomware, it’s not enough to buy antivirus software and simply set it and forget it. We’ll monitor and patch your endpoint security to help you avoid costly system failures, damages or security breaches.

OUR EXPERIENCED SECURITY TEAM WILL:

- Proactively manage antivirus endpoint protection for your servers and workstations
- Perform real-time audits of your environment to ensure antivirus is installed, updated and reporting from all workstations and servers

BENEFITS OF ENDPOINT PROTECTION AS A SERVICE:

- The benefit of a centralized security platform that’s monitored and managed by our security team
- Virus, malware, and ransomware alerts sent to Ricoh’s security team for quick response
- Monthly reports that show threat details, number of protected devices and patching specifics
