Knowledge is the best defense

Ricoh Cybersecurity Awareness Training will make your employees your strongest first line of defense against cyberattacks.

WHAT THIS COURSE COVERS:

1. **Common cybersecurity concerns**: Learn about the types of threats that exist and understand their effects on business and data.

2. **Threat landscape**: Find out where attacks like ransomware and zero-day vulnerabilities are originating from and why they are so difficult to stop.

3. **Best practices for protection**: Learn how to avoid scams, recognize threats, and take the necessary action to protect sensitive data and information.

4. **Enhanced defenses**: Find out how other IT departments are fighting back and what the government is doing to combat cybercrime.

**ACCESS TO ONLINE PORTAL**

Make cybersecurity awareness training easily part of every new employee onboarding experience with pre-recorded videos and content.

**COMPREHENSIVE CONSULTATION**

Experienced cybersecurity specialists will review your practices and tailor the course to areas that are of concern for your business.

**INTERNAL COMMUNICATIONS MATERIALS**

For a 360° approach to cybersecurity awareness within your organization, you’ll have access to additional communications materials such as posters and weekly security bulletins.
